EXPERIENCE

Lead Frontend Developer | Blueprint Media House (2019 - 2021)

- Built and optimized **conversion-focused websites** for international clients
- Developed scalable websites with WordPress and React applications with modern UI
- Designed and implemented **SEO-optimized, performance-driven UIs**

Freelance Web Developer (2021 - Present)

- Created **custom web applications** with a focus on **minimalist and modern UI/UX**
- Built full-stack applications using **Next.js, Stripe, and Clerk**
- Designed **blogs and portfolios** websites with SEO focus

PROJECTS

Buyify — *Next.js eCommerce App*

Powered by Next.js 15, TypeScript, Framer Motion, and Stripe, offering secure authentication.

CacaoTalk — *Real-Time Chat App*

Seamless messaging, secure authentication, and cloud media storage. Built with React, Vite, Socket.io, and Zustand.

Spendable — *Next.js Savings Helper*

Calculates hours you need to work to make your next purchases. Built with Next.js 15 and TypeScript.

WriteMe — *AI Markdown Generator*

Get Markdown framework for your Github repo. Built with Next.js, OpenAI, and Clerk authentication.

EDUCATION

Independent Studies & Skill Development

September 2024 - Present

Focused on expanding my knowledge in development through courses from Google, Odin Project and FreeCodeCamp. My education included learning Express, Next.js, TypeScript, SQL/NoSQL, and more fundamentals of languages, frameworks, and libraries I already use. I built personal projects to refine skills, solve problems, and stay current with industry trends.

Digital Marketing - University of Toronto Continued Studies

May 2023 - September 2023

Studied SEO, PPC, social media marketing, and analytics, gaining hands-on experience with Google Ads, Google Analytics, and Meta Ads to develop data-driven marketing strategies.
